

# Using Practice and Process Codes To Improve Student Achievement

## In-Person Training – February 26<sup>th</sup> – Jefferson City

We all know what a car does and know different types of cars. But when it comes to how they work, all the intricacies that go into making it truly functional, some of us are at a loss, especially when it comes to diagnosing problems. The same can be said for our curriculum. We know what the students should learn in the different areas, but are the students skilled at the intricacies of making the knowledge functional? Do the students know HOW to apply that knowledge?

The Missouri Learning Standards lay out the "what" students should know, but how do we determine the "how" we teach them? Join us as we look at the different ways students acquire knowledge through inquiry, communication, and problem solving as we explore DESE's Practices and Processes, along with the four C's (critical thinking, creativity, collaboration, and communication) of the 21st Century Learning Skills. And just like choosing the right vehicle for the trip, we will look at ways to match the right "how" with "the what" to maximize student learning and engagement.

Sign up today to join us on this scenic adventure of looking at the HOW to help your students master the WHAT.

**Please bring a charged device to access the session presentation folder and electronic handouts**

**Location:** NH Scheppers Meeting Room | 2300 St. Mary's Blvd | Jefferson City, MO 65109

**Target Audience:** Curriculum Directors, Administrators, or lead teachers assigned to the duty of overseeing curriculum writing.
